1. Message from Shane Burgess

- An update on the Arizona Science Engineering & Math Scholars program, which is a model at UArizona. The program aims to boost student recruitment and development, with new residential undergraduate programs, five new online and distance undergraduate degrees, and new student recruiting and development programs.
- A focus on career and entrepreneurial leadership development in colleges of agriculture and life sciences.
- Information on the new Center Director, new Assistant Director, and new Assistant Director.

2. Winter Budget and Planning Retreat

- The winter budget and planning retreat is held twice each year, with leaders across the division responding strategically. The retreat's agenda and presentation materials are available online.
- The retreat includes workshops, pre-award approval processes, compliance, and activities of the Dean's Research Advisory Council.

3. Upcoming Events

- The Spring 2020 Workshops calendar is available for viewing.
- The #24, #20, and #2 National Science Foundation (NSF) Conference on LCOE is scheduled in March.
- A workshop on the entrepreneurial mindset for all CALS students is also announced.

4. The SOS Program

- The SOS program has 3 full-time staff members and a graduate assistant working directly with SOS, but the program has more staff due to its collaborative nature.
- When students find themselves unsure about where to go for answers, UA students who face questions or issues can access SOS Support. Opportunity. Success.

5. Why SOS?

- SOS provides a place and fit for every Wildcat, helping students decide what being a Wildcat looks like for them. Sense of belonging is enhanced when students know that there is someone who can answer their questions.

6. The Best Ways to Lower Triglycerides

- A HealthCentral article discussing the best ways to lower triglycerides.

7. In the News

- An article from Science Friday about consumer reports and why parents should be cautious when using household disinfectants.
